Quarterly Highlight

JPNZ processed it's one-millionth tonne of carrots.

Juice Products New Zealand (JPNZ) reached a milestone in mid-February, processing its one-millionth tonne (one billion kilograms) of carrots at its Washdyke, Timaru facility since operations began. Chief executive Chris Renfree says "the milestone is a tribute to the long-term partnerships that underpin the business. It's the result of decades of commitment from our growers, our people, and our customers, working together to build something truly world-class here in Timaru."

"From local paddocks to global markets, every carrot represents the skill of South Canterbury farmers and the dedication of our team in Washdyke. We're incredibly proud of what's been achieved, and even more excited about what comes next."

GDP Growth

Timaru District  +0.5%
New Zealand  +0.4%
